5x5 Quick Suite AI Insights Accelerator

RED OAK strategic

The 5x5 Quick Suite AI Insights Accelerator is a complimentary BI dashboard environment, built for organizations to unify, analyze, and visualize data across every department and system without disrupting their existing technology stack. As a trusted AWS Partner with a Data & Analytics Competency, Red Oak Strategic is equipped to rapidly deploy dashboards for 5 users, using 5 of your real data sources, in 5 days. The goal of this engagement is to provide a low-risk entry point to cutting edge AI enhanced Business Intelligence capabilities.

EARLY ADOPTER

5X5

Get AI-first Business Intelligence in 5 days

✓ **Automated reporting on your data**

✓ **Natural language querying**
(Ask your database anything)

✓ **AI powered insights & summaries**

✓ **Secure integrations with Slack, Email & core SaaS tools**

✓ **New Quick Suite features**
(Flows and Spaces)

What You Get

• Launch Quick Suite with proper security and access controls for 5 users with a natural language ChatBot

• Integrate 5 of your valuable data sources into Quick Suite in 5 days, and add more over time

• Build and launch a test Dashboard to visualize your data within 1 business week!

• Educate your team on how to scale, access, and use this data with Quick Suite's AI tooling to ask questions and generate reports right away

• Develop a 3-6 month production strategy to leverage Quick Suite throughout the rest of your organization

Rapid Deployment

· Deploy a Quick Suite Dashboard 5 in days.
· Proven, repeatable architecture used across multiple industries
· Validation logic to ensure consistent, high-quality data

Unified, Real-Time Analytics

· Combine data from multiple platforms into a single interactive analytics layer
· Enable business-wide visibility across finance, operations, and customer metrics
· Automated Ingestion: Pipelines to ingest data from all major business platforms

Scalable & Cost-Efficient

· Serverless, AWS-native design that scales with demand
· Reduced reporting time and consolidated data pipelines
· A future-ready foundation for AI forecasting, operational optimization, and strategic planning

Data Ownership & Flexibility

· Maintain full control of your data within AWS
· Easily extend for new data sources, dashboards, and use cases
· Avoid vendor lock-in by keeping data and analytics assets fully portable within your AWS account

Power Your Team with Smarter Data.
